

Life Sciences Practice

Fennemore Craig has a large life sciences practice representing clients ranging from entrepreneurs to universities to Fortune 500 companies. With more than 120 years of experience in supporting the growth and evolution of the region's entrepreneurs and businesses, Fennemore Craig knows the territory. We provide intellectual property and life sciences counsel in areas as diverse as:

- Agriculture
- Bioinformatics
- Chemical Processes
- Cosmetics
- Diagnostics
- Dietary Supplements
- Drug Delivery Systems
- Drug Discovery
- Food Chemistry
- Genomics
- Immunology
- Medical Devices
- Molecular Biology
- Nanotechnology
- Nutraceuticals
- Pharmaceuticals
- Plant Molecular Biology
- Pharmacogenomics
- Proteomics
- Virology

We are educated in the ways of business, as well as science, possessing education and training in biology, biochemistry, engineering, life sciences, and chemistry. Our approach is thoughtful, yet practical, reflecting not only an understanding of the law, but also the business and research environments of our clients' industries.

Our clients recognize and appreciate that, not only do we know about the technology behind life sciences, but we are highly experienced in many other issues facing life science-related business ventures.

We can easily call upon the resources of lawyers experienced in financing, joint ventures, mergers and acquisitions, all types of litigation, employment and real estate, as well as other areas. 180 lawyers in five offices support our service and commitment to our clients.
